DETAILED ACTION

Claims 1-3 are pending.

Claims 1-3 are rejected.

Claim Rejections - 35 USC § 102

1. Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by BusinessWeek Online May 27, 2002, "A New Job for Wall Sockets: Networking" (hereinafter HomePlug).

Regarding claim 1, HomePlug teaches a system with a bi-directional bridge (media converter) between a Power Line Communications (PLC) based network and a coaxial based network wherein the PLC side provides the Wide Area Network connection and the coaxial side provides a Local Area Network connection and bi-directional bridge allows the bi-directional transport of standard media protocols from the high or medium voltage Wide Area Network side to low voltage requirements of the coaxial networks (HomePlug, paragraph 2-3, The Powerline Etherfast 10/100 bridge connects to computing devices with a standard Ethernet port. The HomePlug adapters plug into the electrical outlets which then connect to computers using Ethernet, cable, DSL, or broadband connections.).

Regarding claim 2, HomePlug teaches the system with the bi-directional bridge of claim 1 wherein RF signals containing the standard media protocols are conveyed

over the PLC based networks to a media converter located associated with a building with at least one dwelling unit (HomePlug, paragraph 7 discloses communications over AC power lines running at 110 to 230 volts and at 50 or 60 Hertz.).

Regarding claim 3, HomePlug teaches the system with the bi-directional bridge of claim 2 further comprising at least one additional media converter to allow the extension of the Wide Area Network to support the deployment of broadband services across a physically dispersed area without the requirement for separate and unique Wide Area Network connections (HomePlug, paragraph 3-4, Homeplug devices enable communication services throughout separate rooms of a house.).

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. 2003/0235236 discloses communications through power lines. U.S. 6,040,759 discloses a broadband communications through electrical power cables. U.S. 6,480,510 discloses a LAN using electrically-conducting media such as in-house telephone or electrical wiring.
